

Графическое описание местоположения границ территориальных зон, перечень координат характерных точек этих границ п.Старопышминск

Графическое описание местоположения границ территориальных зон

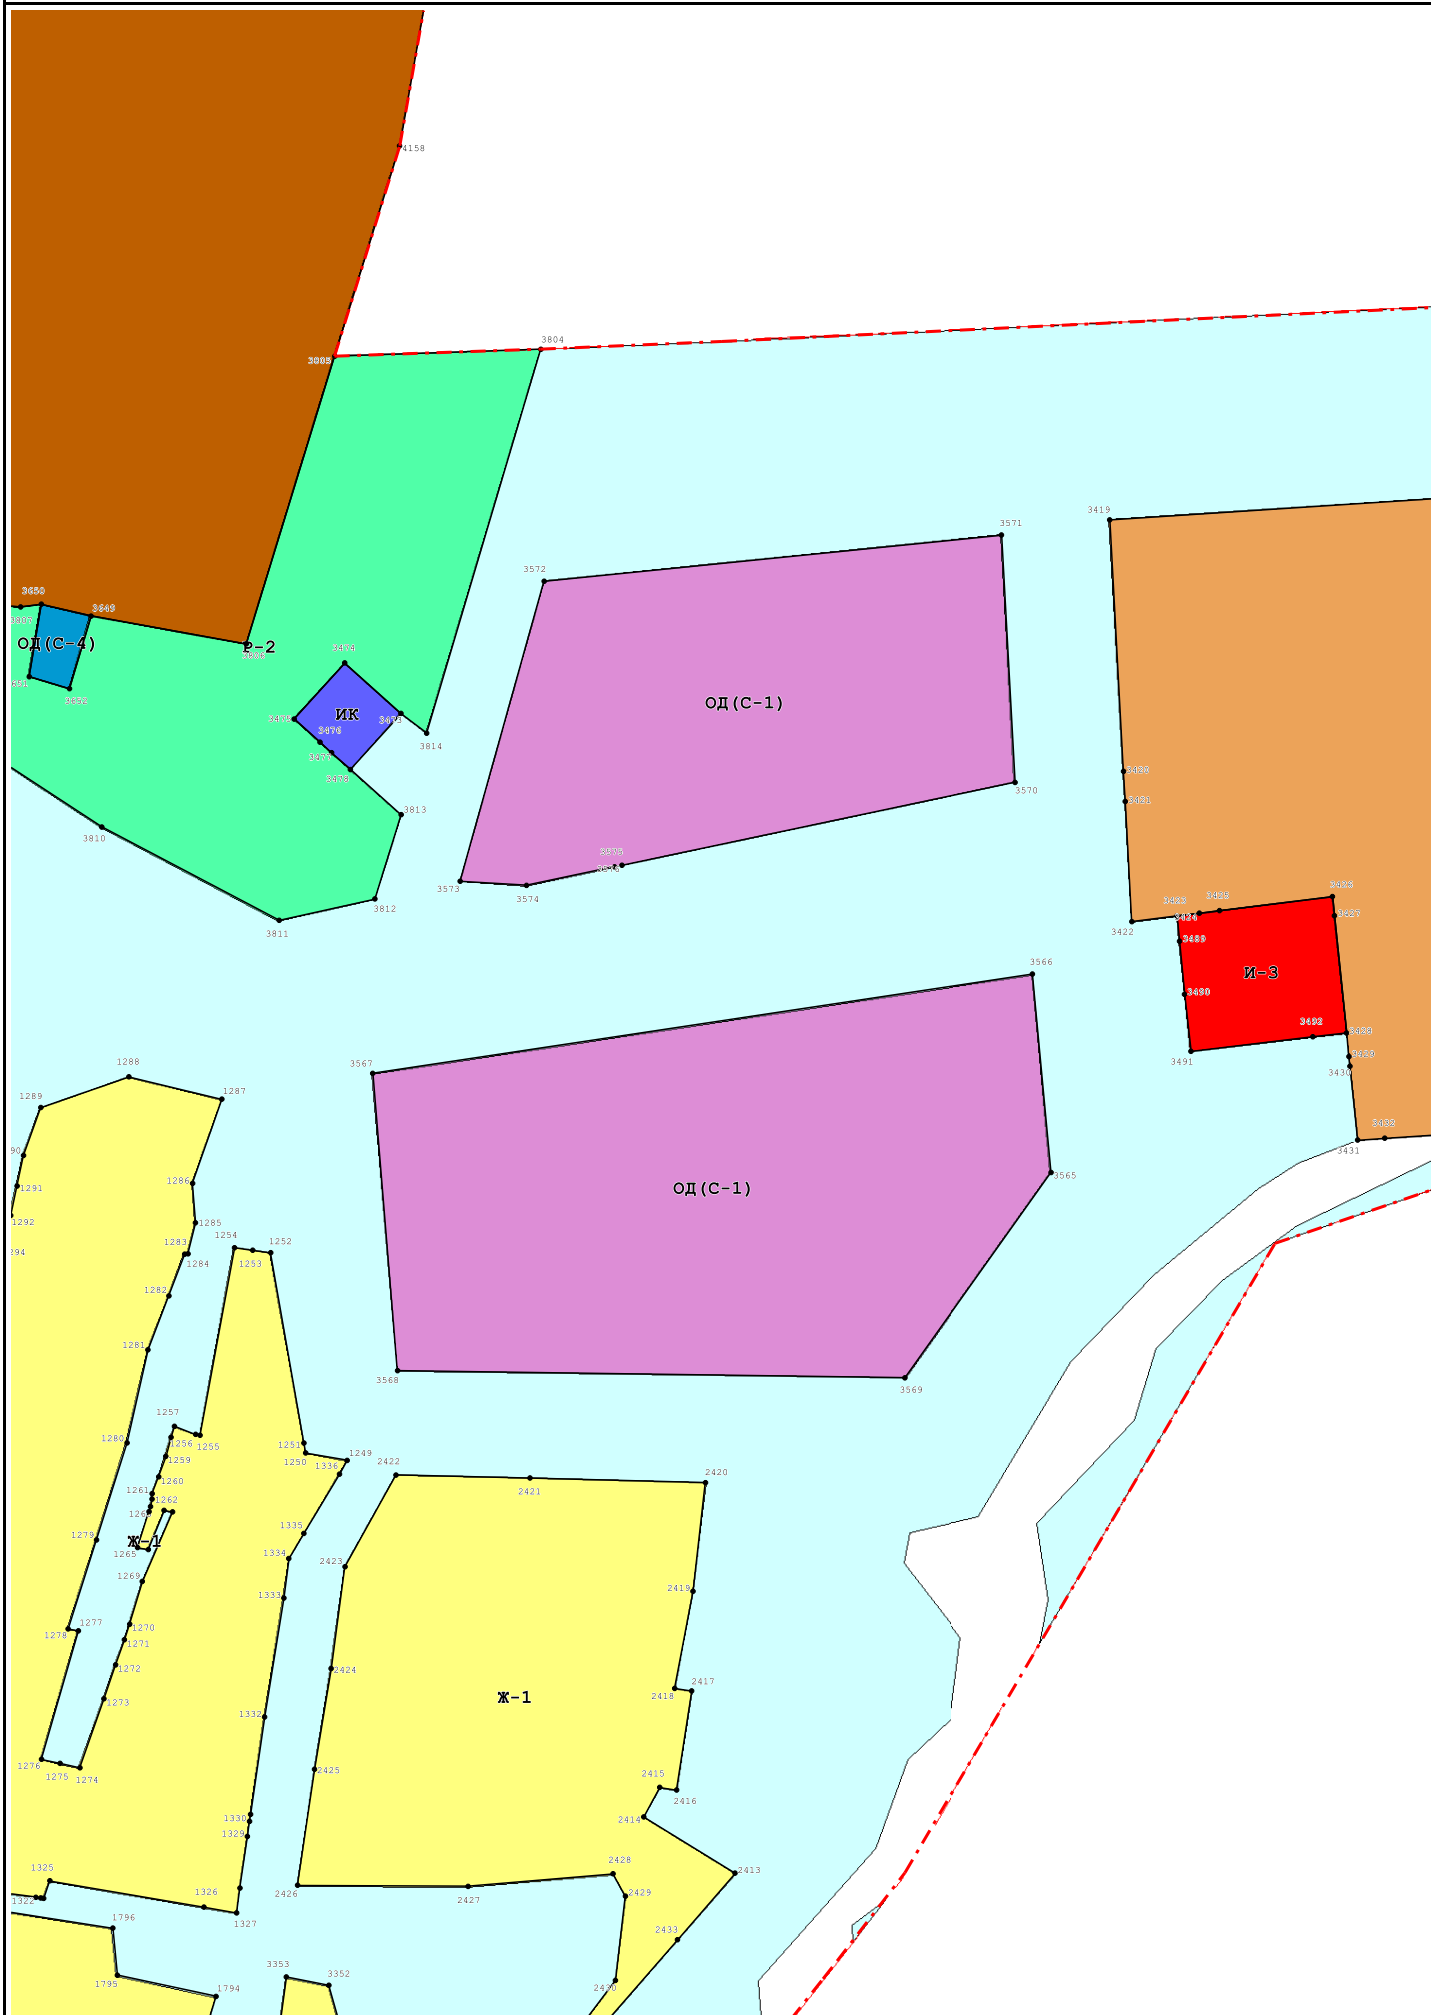

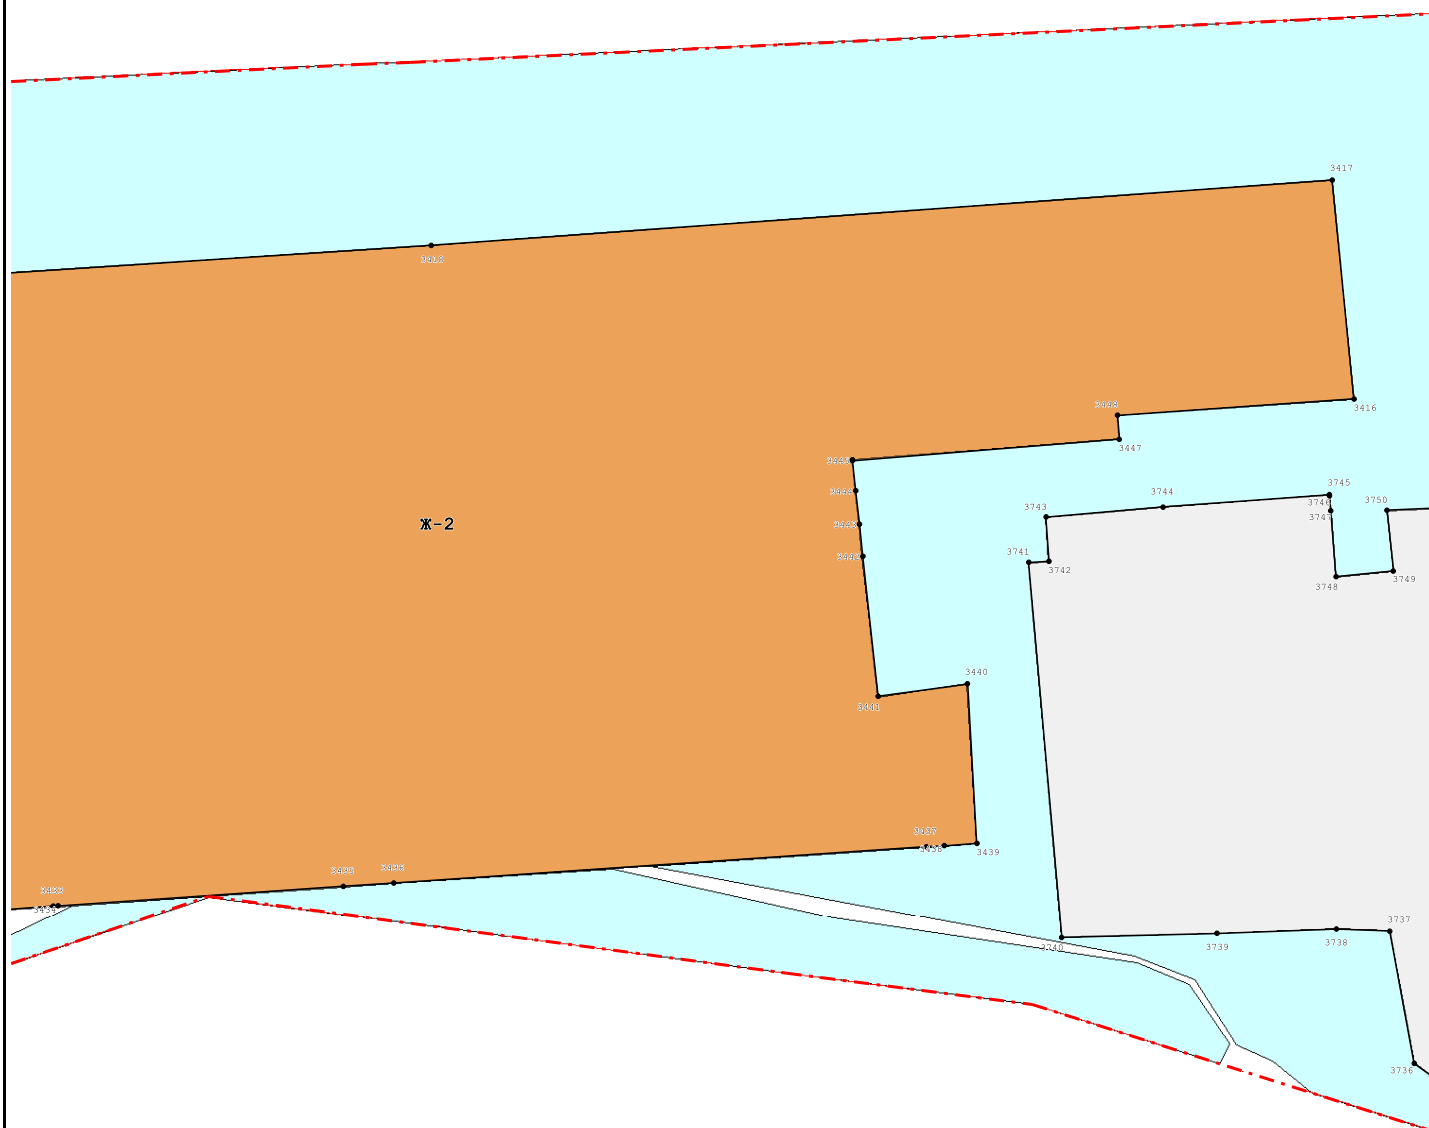

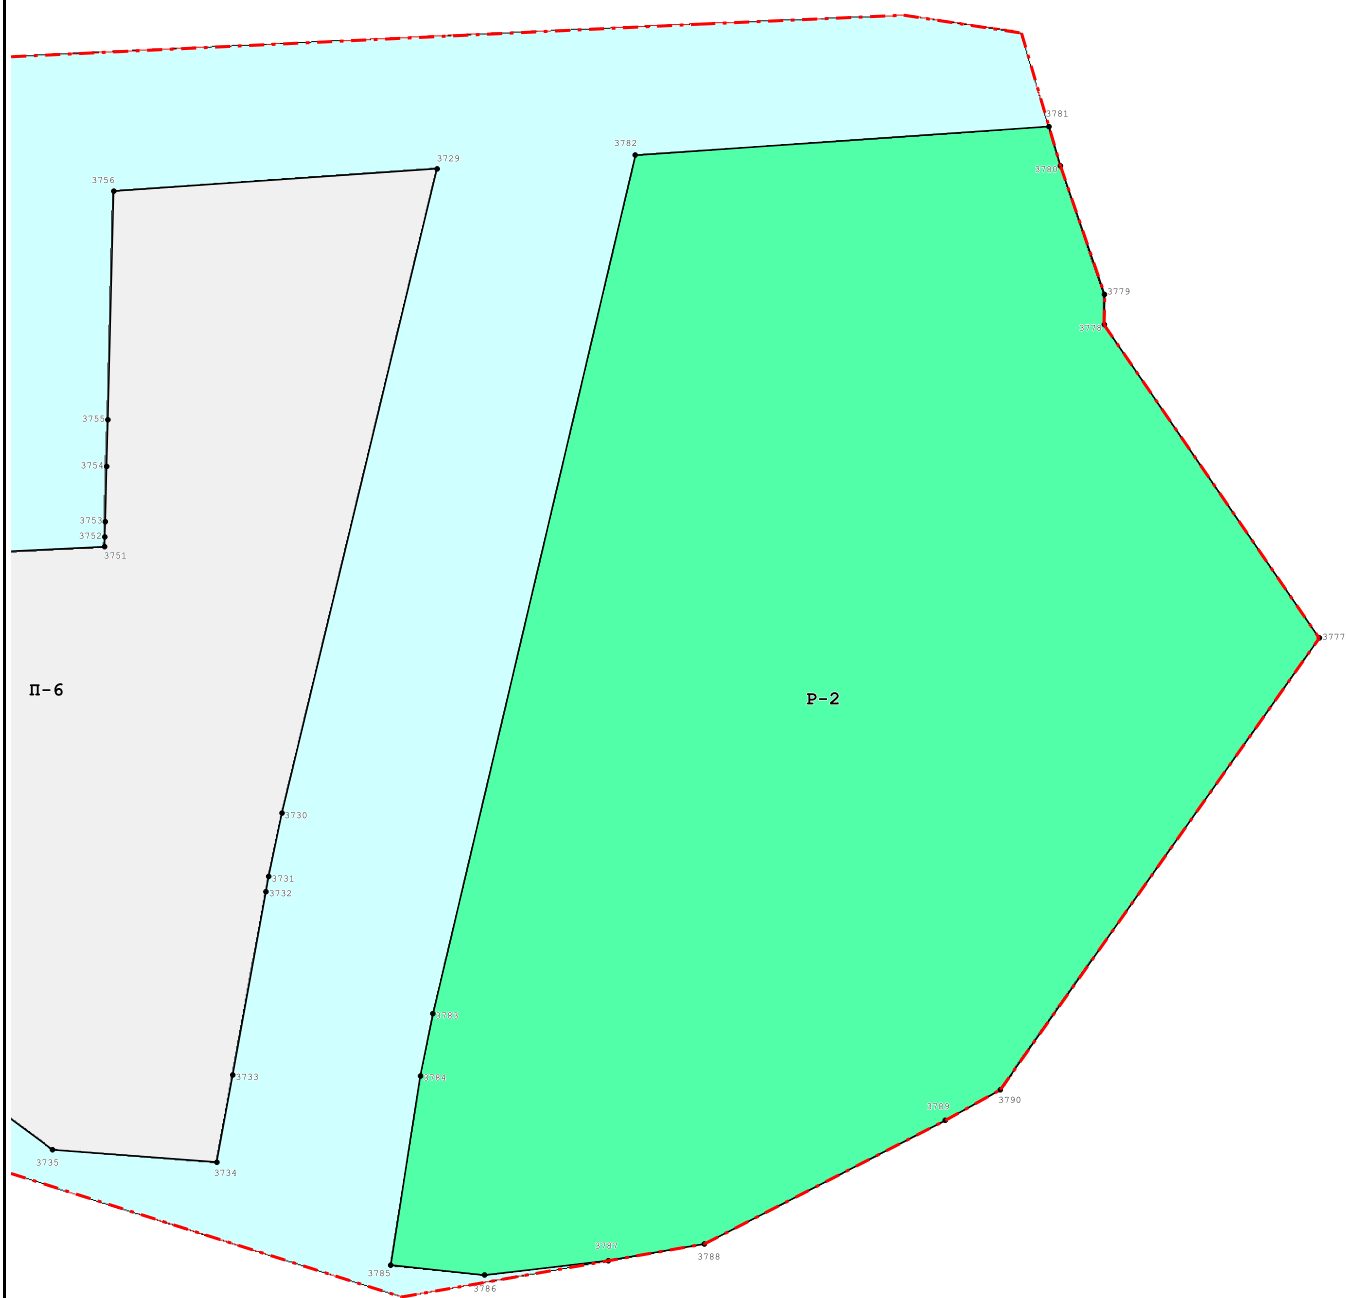

Выносной лист 4

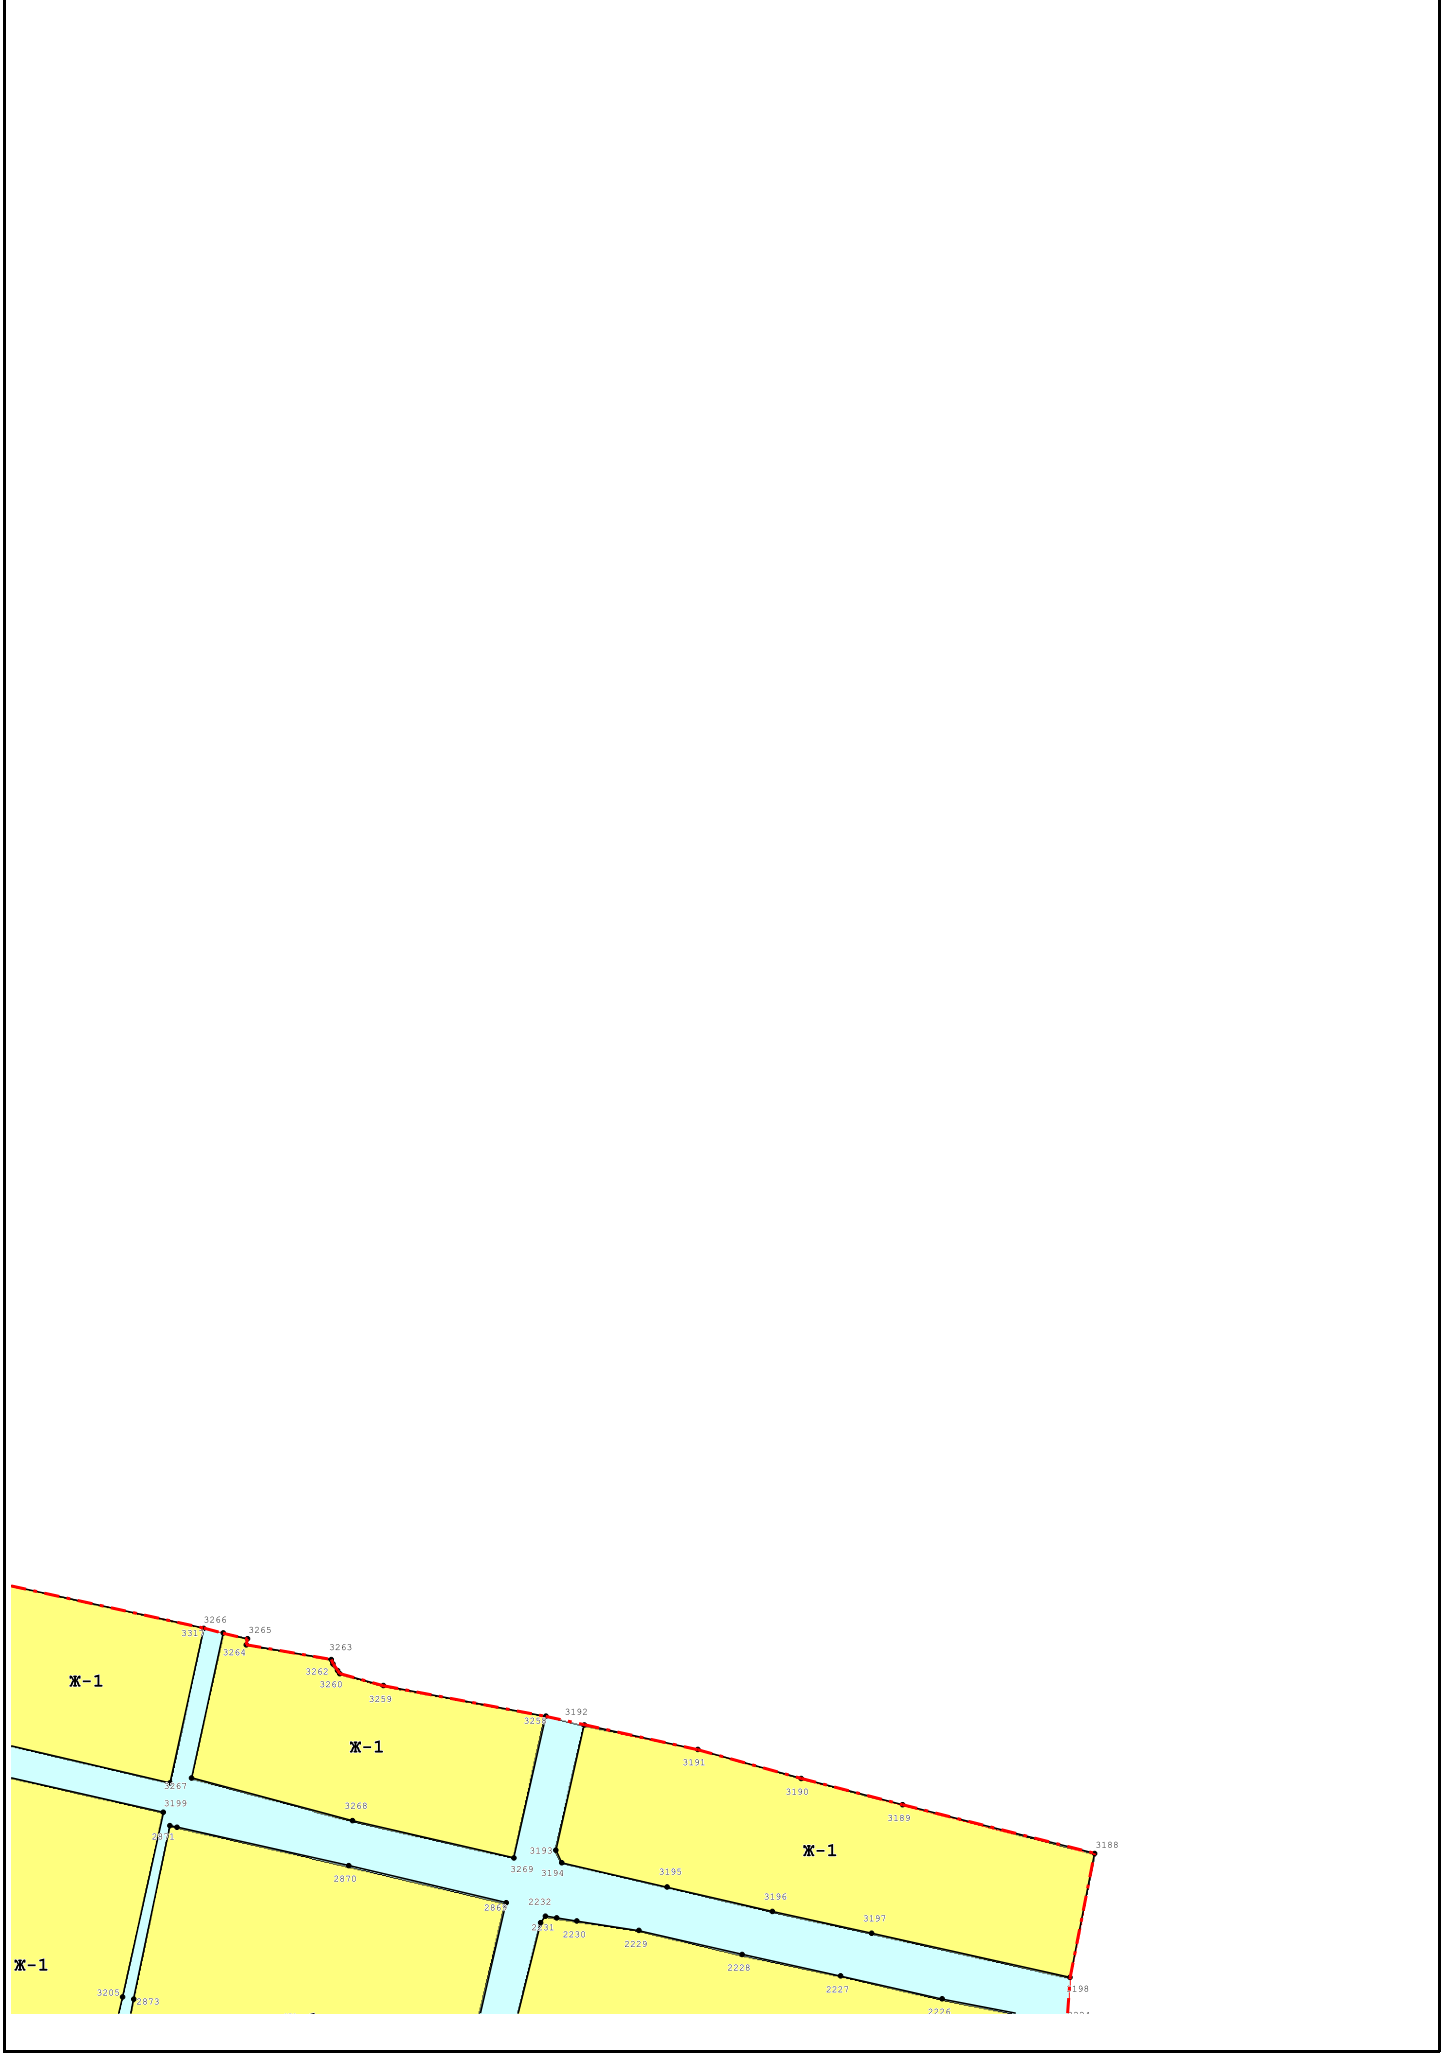

The map displays a complex land plot with several distinct zones and numerous boundary points marked with numerical coordinates. The zones are color-coded: yellow for residential (Ж-1), green for public use (П-2), pink for common property (ОД (К)), and brown for industrial or storage (И-1). The plot is divided into several irregular polygons, some of which are further subdivided. The boundaries are defined by a series of connected line segments, each labeled with a unique numerical value representing the coordinates of the vertices. The overall shape of the plot is irregular, with several protrusions and indentations. The map is oriented with the top edge horizontal. The numerical values are printed in a small, black font, often rotated to follow the orientation of the boundary segments. The background of the map is a light blue color, representing the sky or water. The plot itself is filled with the colors corresponding to its zones. The map is a technical drawing, likely a cadastral plan, used for land management and legal purposes.
